PROFILE

Hello! My name is Ondrej Vorel and I am BI & Data Analytics enthusiast with over 6 years of professional experience from Germany, Czech Republic and Greece. Over the course of my career, I have had an opportunity to work in Business Intelligence, Big Data and Marketing Analysis environments which provided me with a full range of exceptional experience. In particular, I have adopted techniques of:

- *Processing extensive data coming from various sources in distinct formats.*
- *Building complex data architecture using modern database systems.*
- *Presenting data along with the most powerful analytic tools.*

Having gained all the valuable expertise in the field I had decided to quit a "big corporation" life and I started to provide my own consultancy and services. My major intention to work as a freelancer is the opportunity of being engaged in a variety of interesting projects so I can employ my skills and experience in order to provide the first-class services for all my clients.
